### Heat is On

Thanks to the warmer than average temperatures, we've been able to heat the pool. We had a slight delay because the heat pump needed repair. But late Friday (2/12) we were able to start up the heat. On Saturday (2/13) the water was at 68° up from 59° .

By the 17<sup>th</sup> the water temperature was 83° and has been holding there. The progress was being charted on the bulletin board while it came up to the 80's. Now that the water is up to our goal, we will replace the sign with just a notice that says “The Heat is On”.

The heat will remain on as long as the weather is warm enough as measured by an average daily temperature of 65° degrees or more.
